

POLLUTION

By Charlotte Campbell

What is pollution?

- Pollution happens when the environment is contaminated or dirtied by waste , chemicals, and other harmful substances.
- Pollution can contaminate air, water and land .

Effects of pollution

- Air pollution causes lung diseases and asthma.
- Water pollution kills 100 million marine animals every year.
- Land pollution kills one million land animals every year.

How to reduce the amount of pollution

- To reduce the amount of pollution you can walk, scoot, skate or cycle instead of driving.
- Don't litter.
- Avoid burning leaves, rubbish and other materials.
- Dispose of chemicals properly.
- Reuse reusable water bottles instead of putting them in the bin.
- Reuse over again.
